Eugene Park

ewp@mit.edu | 857-231-1637 | parkakn.github.io

Education

New York University, Courant Institute of Mathematical Sciences — New York, NY
M.S. in Mathematics — Sept. 2021 - May 2023
Advisor: Prof. Kenneth Winston
Thesis: *"PCA and Hidden Markov Model for Forecasting Stock Returns"*

Boston College — Chestnut Hill, MA
B.A. in Mathematics, B.A. in Economics (Honors) — Aug. 2017 - May 2021
Advisor: Prof. Robert Murphy
Thesis: *"Stock Market Approach for the Financial Instability Hypothesis"*

Research Experience

MIT Media Lab, Personal Robots Group — Nov. 2024 - Present
Advisor: Prof. Cynthia Breazeal

Development on Deployed AI Tutoring System

- Implemented multimodal LLM-based document parsing and context-enriched chunking for the system's RAG pipeline.
- Integrated an LLM-based student progress tracker for individualized responses.
- Built a feedback generation feature based on student classroom performance (e.g. quiz results) for LLM-generated longitudinal feedback that further contextualizes tutor responses.

Evaluating Pedagogy and Effectiveness of Language Models as AI Tutors

- Developed a two-layer evaluation framework that decomposes pedagogical behaviors into pedagogically harmful behaviors and instructional styles.
- Designed a controlled study across multiple sessions with varied learning scenarios and an assessments grounded on the Bloom's taxonomy to measure student learning outcomes.

Exploring Multimodal Tutoring with Large Language Models

- Built a multimodal data collection system that captures, cleans, and synchronizes drawing and conversational data from real human tutoring sessions.
- Conducted experiments on the sketch-generation capabilities of frontier large language models for visual tutoring with Calculus problems.

Language Model Alignment in High-Stakes Scenarios

- Benchmarked language models on their susceptibility to insider-threat behaviors (e.g. blackmail).
- Designed a user study to validate multi-tier LLM agent decisions in real medical triage scenarios.
- Curated a multi-modal dataset of 6,876 NEJM clinical case reports, containing text, images, and tabular data, used to finetune LLMs for proactive clinical assistance.

Skills Demand Analysis for AI Curriculum Development

- Analyzed AI skills demand patterns in 301K+ U.S. job postings to inform AI curriculum designs.

MIT Open Learning — Mar. 2024 - Oct. 2024
Advisor: Dr. George Westerman

- Modeled U.S. job mobility pathways using first-order Markov chains built from 59M+ worker career histories and derived high-value origin roles for advanced manufacturing career pipelines.

MIT Sloan School of Management July 2023 - Feb. 2024
Advisor: Prof. Antoinette Schoar

- Analyzed transactions data in the Bitcoin blockchain to identify adverse entities in the Bitcoin network and determine the reward structures of large mining pools.

Publications

In Preparation

[1] **Eugene Park**, Daniel Wjendel, Grace Lin, Sharifa Alghowinem, Eric Klopfer, Cynthia Breazeal. *"Pedagogical Misalignment: Instructional Integrity in Large Language Models". International Conference on Machine Learning (ICML)*. 2026.

In Submission

[1] **Eugene Park**, Daniel Wjendel, Grace Lin, Sharifa Alghowinem, Eric Klopfer, Cynthia Breazeal. *"An Evaluation Framework for Pedagogical Large Language Models". International Society of the Learning Sciences (ISLS) Workshop*. 2026.

Under Review

Research Interests

AI Alignment; AI Interpretability; AI systems for decision making under uncertainty

Selected Projects

Robo-Advisor for the Korean Individual Retirement Pension Funds Feb. 2024

Developed a systematic algorithmic trading strategy for Individual Retirement Pension (IRP) accounts in South Korea. The system passed the six-month evaluation by the Robo Advisor Test Bed Center and was launched in November 2024 with $6.7k capital, generating a 15.58% annualized return.

Pricing Exotic Derivative Contract May 2022

Developed a pricing routine for an exotic put option by modeling equity and interest-rate dynamics using stochastic differential equations and implementing a Monte Carlo simulation to estimate fair value.

Industry Experience

Giant Oak, *Student Research Assistant* Jun. 2022 – May 2023

Analyzed dimensionality reduction for affect-based embeddings to improve entity representation.

Brain Asset Management, *Research Intern* Winter 2019

Conducted market analysis on the global semiconductor industry.

Mertiz Securities, *Research Intern* Summer 2018

Analyzed financial statements and wrote investment reports for YG Entertainment and Facebook.

Honors & Awards

2021 - Omicron Delta Epsilon, International Honor Society in Economics
2019 - Boston College Portfolio Challenge, 3rd Place
2018 - Citi Investment Banking Case Competition, 1st Place

Selected Coursework

Pure Mathematics: Linear Algebra*, Real Analysis*, Differential Geometry*, Abstract Algebra, Complex Variables*

Applied Mathematics: Partial Differential Equations*, Ordinary Differential Equations*, Dynamical Systems, Time Series Analysis, Probability & Stochastic Processes*, Stochastic Calculus & Option Pricing*, Risk & Portfolio Management*

Economics & Finance: Advanced Econometrics, Intermediate Microeconomic Theory, Intermediate Macroeconomic Theory, Monetary Economics, International Trade and Finance, Corporate Finance

* graduate-level

Technical Skills

Deep Learning Frameworks: PyTorch, HuggingFace transformers
Programming Languages: Python, SQL, R, Stata
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib
Other Tools: FastAPI, Svelte, Firebase, Vercel, Render, Git, Docker
